dogaware health arthritis in dogs Home > Health > Arthritis. Arthritis in Dogs. Pictured is my dog Piglet at age 15. Piglet had severe degenerative joint disease in both elbows. See the link to Piglet's Story below for how I managed her condition and kept her mobile for 17 years.

scrotal castration versus prescrotal castration in dogs
For many years, the prescrotal technique has been taught as the only acceptable method of canine castration. 1 However, scrotal castration has gained popularity in recent years as a safe alternative to the prescrotal technique. First described in 1974, 2 this technique may offer the advantage of reducing surgical time while not increasing complication. advantage of reducing surgical time while not increasing complication rates over the traditional prescrotal ... a review of translational animal models for knee

The method of osteoarthritis induction is another important consideration. While surgical anterior (cranial) cruciate ligament (ACL) transection has been the most commonly used animal model for osteoarthritis, particularly in dogs, it may not be the most applicable to human OA. evidence update cold laser therapy for dogs cats the

I first summarized the scant evidence concerning low-level or "cold― laser therapy in companion animals in 2010, and I reviewed a couple of small studies in 2011. A recent checked showed only a couple of studies looking at cold laser since.

tplo tta not good choices

Most websites about TPLO and TTA are the sites of surgeons who are selling these high-profit surgical procedures. This page is here to provide you with the facts about TPLO and TTA that you won't find at TPLO / TTA surgeons' websites or hear from them at their offices.

conventional stabilization surgeries dog

I suggest using careful restriction as a first step in determining how best to deal with a dog's ligament injury. This careful restriction for 8 weeks is the best diagnostic tool to determine if the dog will be able to recover

well without surgery.

some dogs are more prone to acl tears fidose of reality

Is there a genetic and/or familial connection for dogs who tear their ACL? According to veterinary medical research, there are some dogs, breeds, and even a familial component existing with regards to tearing their anterior cruciate ligament.
