[denon avr 2803 digital surround receiver sound vision](#)

Actually, if you do the math, the AVR-2803's rated output power isn't low at all. At 90 watts per channel - and here that means seven channels, including two back surround outputs - the receiver will deliver only about a half decibel less power than a receiver rated for 100 watts per channel, if both are driven to full output.
