

VENDOR ID LINUX USB

[vendor id linux usb](#)

List of USB ID's ## Maintained by Stephen J. Gowdy # If you have any new entries, please submit them via # <http://www.linux-usb.org/usb-ids.html> # or send ...

[the usb id repository linux usb](#)

This is a public repository of all known ID's used in USB devices: ID's of vendors, devices, subsystems and device classes. It is used in various programs (e.g., The USB Utilities) to display full human-readable names instead of cryptic numeric codes. Welcome to the new web interface of the USB ID database.

[usb instrument control tutorial national instruments](#)

1. USB and VISA Background VISA is a high-level API used to communicate with instrumentation buses. It is platform independent, bus independent, and environment independent.
